

Curriculum Vitae

Kenji Suzuki

(Juntendo University School of
Medicine)

Education

- 1990.6-1992.6 National Defense Medical College , Residency
- 1992.7-1995.6 Yokosuka Hospital , General Surgery
- 1995.7-1996.5 National Cancer Center Hospital East , General Surgery
- 1996.6-1997.9 National Cancer Center Research Institute East , Molecular biology
- 1997.10-1997.12 National Cancer Center Research Institute East ,Pathology division
- 1998.1-1999.5 National Cancer Center Hospital East , Thoracic Surgery
- 1999.6-2008.1 National Cancer Center Hospital , Thoracic Surgery
- 2008.2- Juntendo University School of Medicine , Thoracic Surgery

Professional experience

I graduated from National Defense Medical College in March 1990, and became a resident of National Cancer Center Hospital East after five years of training as a general surgeon. During the residency, I learned thoracic surgery for 31 months, molecular biology for 14 months, and pulmonary pathology for 3 months. I am interested in not only clinical oncology but also molecular biology of lung cancer. My research was focused on molecular analyses in lung cancer patients with extreme clinicopathological feature. Since June of this year, I have been attending surgeon in the division of thoracic surgery, National Cancer Center Hospital, Japan (Prof. Ryosuke Tsuchiya). I have moved to Juntendo University School of Medicine to be the professor and chairman of general thoracic surgery since February 2008.
